

For Immediate Release

Dyrand Systems Managed Network Service Selected By BTY Group

Vancouver, BC — March 14, 2005 Dyrand Systems Inc, a provider of managed network & security services, announced today that BTY Group has selected Dyrand System's Managed Network Service for its complete IT support requirements.

“Moving a growing office of professionals from one location to another is a daunting task. Trying to manage and expand your IT infrastructure at the same time is even more challenging. By partnering with Dyrand Systems we were able to move our entire IT infrastructure in one weekend without disruptions for our users. With Dyrand’s virtual IT department in place we can now focus on our core business while they take care of our network as if it was their own,” says Gordon Smith, Principal at BTY Group.

“Today's competitive work environment requires companies to do more with less. We are constantly looking to improve our service offering so that we may serve our outsourcing clients in a more effective, less costly manner.” says Trent Dyrsmid, CEO and founder of Dyrand Systems. “We are very excited to add such a prestigious company as BTY Group to our client list. We look forward to providing them with the peace of mind that their IT is taken care of by experts.”

Dyrand’s Managed Network Service provides small and medium sized companies with all the benefits of a full-time IT department for less than the cost of a single employee.

ABOUT BTY GROUP

BTY Group is a Quantity Surveyor consultancy, specializing in Cost Management, Project Management and Project Monitoring services. With a rapidly expanding and diverse workload in construction and development, BTY provides services through offices in Vancouver, Toronto, Edmonton, Calgary and Victoria. Over the past 26 years BTY Group has earned a reputation for providing clients with professional and practical advice of the highest caliber. The diversity of BTY’s client base attests to their ability to adapt critical thinking and analysis to the task at hand.
